

# Project developers monetising wasted gas

Generating value from the \$27 billion global gas flaring opportunity  
 Materially decarbonising oil and gas to accelerate the energy transition

## We bring together assets, solutions and financing to deliver on-the-ground solutions

Our offer to monetise wasted gas is unique

We are positioned to move quickly, seeking partnership with asset owners

### We are committed partners

- Delivering cooperatively with you, enabling you to focus on your core
- Providing expertise with 100% focus on flare and venting capture
- Fully-funded to invest in country with access to institutional money committed to GHG reduction
- Flexibility in commercial structuring
- Well networked with international bodies (World Bank/IFC, IEA, EDF, RMI, OGCI, EBRD, MGP, CCAC etc.)

### Our track record is proven

- Project delivery in Russia, Ukraine, Netherlands, Europe and North America
- Delivering faster than others and to world class standards
- Ensuring training and hiring of local talent
- Designing the best solution, with a technology agnostic approach
- Developing projects in Algeria, Egypt, Libya, Canada and more

### Capterio delivers

- ✓ Additional revenues
- ✓ Risk free reserves and production
- ✓ Lower unit cost
- ✓ Access to financing
- ✓ Lower greenhouse gas emissions

### Creating a triple win

- 1 For asset owners and operators
- 2 For national oil companies and governments
- 3 For people and planet

### Selected credentials

3 mmscf/d flare capture to recover gas and create new LPG market

10 mmscf/d flare capture & reinjection to increase reserves potential up to 50%

Innovative operating model with an IOC's non-core assets

Contact us to explore how we can help you capture value, reduce your environmental footprint and provide you with the peace of mind to focus on your core business

## We screen opportunities

Our real-time analytics software pinpoints monetisation opportunities and provides operational insights

Capterio's Global Flare Intelligence Tool (GFIT) enables opportunity screening at a country, region, company or site level

The tool also supports real-time flaring volume and emissions monitoring and benchmarking, providing opportunity to gain insight into operated and non-operated joint venture facilities

Sanitised view of dashboard for Capterio's Global Flaring Intelligence Tool (GFIT)

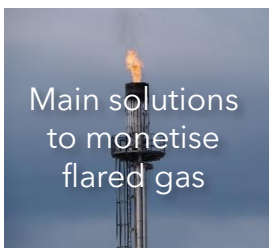

## We deliver solutions

We are technology-agnostic and bring the best monetisation solution to each opportunity

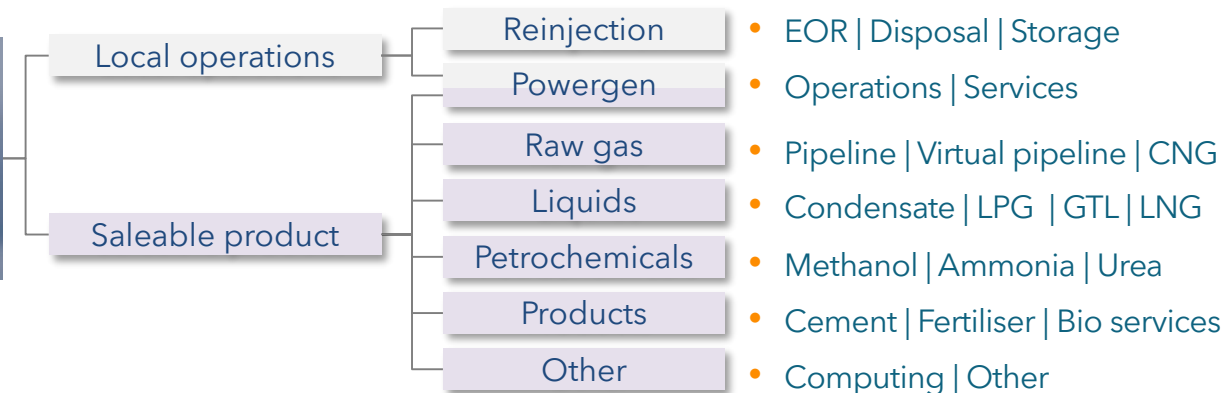

Our monetisation solutions are developed collaboratively with operators. We design and build with a fit-for-purpose approach, delivering projects between 1-50 million cubic feet per day. Our solutions are delivered by experienced management with extensive access to specialists and equipment

Recovering flared gas can add low-risk, low-emission, low-cost barrels and can be cheaper than drilling a well

We also provide services to reduce venting and leaking

Main solutions to monetise flared gas

## We bring investment and provide flexible commercial arrangements

We offer long-term capital, providing the optimal financing structure, on or off balance sheet. Our commercial structuring is flexible and innovative, with multiple options available

### 1. Joint venture

Company forms a joint venture with Capterio. Both entities provide a share of investment in return for a share of incremental sales

### 2. Net profit interest

Contract structured with a higher share of revenue distributed to Capterio until payback is achieved, with a lower share thereafter

### 3. Accelerated pay out

Contract is structured with Capterio receiving an accelerated return within 18-24 months. Hand over to the asset owner with no ongoing Capterio interest

### 4. Processing fee

The asset owner(s) provide Capterio a processing fee and capacity fee, under a "take-or-pay"-type arrangement

Flaring costs society \$850 per second. We are positioned to move quickly
